

# HEDIS COL Colorectal Cancer Screen

## MEASURE DESCRIPTION:

**#102- HEDIS COL Colorectal Cancer Screen** indicates the percentage of members, aged 46 to 75 years at the end of the measurement period, who had appropriate screening for colorectal cancer. Colorectal cancer screening tests include the following: a fecal occult blood test during the measurement year, a flexible sigmoidoscopy during the measurement year or within the previous four years, a colonoscopy during the measurement year or within the previous nine years, a CT colonography during the measurement year or within the previous four years, or a FIT-DNA test during the measurement year or within the previous two years. This excludes people who had a total colectomy or a diagnosis of colorectal cancer any time prior to or during the measurement period, based on claims included in the database. It also excludes patients who used hospice services during the measurement year.

**PROPRIETARY STATUS:** The measure specification methodology uses HEDIS MY2023 Colorectal Cancer Screening (COL) - Certified; Adjusted, NCQA (owner)

## ALLOWABLE ADJUSTMENTS:

1. Organizations are not required to use product line criteria.
  - a. HEDIS Product Lines: Commercial and Medicaid report separately
  - b. Product lines were ignored, and no product line criteria was used when determine eligible population, numerator, continuous enrollment.
2. Age can be adjusted as long as age range was not changed or expanded.
  - a. HEDIS Definition: Age as of December 31st of the measurement year.
  - b. The Age was defined based on the end of the measurement year.
3. Organizations are not required to limit criteria for supplemental data or denied data.
  - a. All data has been used when evaluating eligible population, numerator, and exclusion criteria.
  - b. No restrictions on claim type for the files that are submitted for processing on the standard data files (facility, professional, drug, and lab).
4. Other allowable reporting
  - a. The results incorporate demographic and plan type information for the patient to allow focusing a specific population type.

**MEASURE PACKAGE:** Physician and Health Plan Focus

**MINIMUM DATA REQUIREMENTS (months):** 24

## MEASURE DETAILS:

**NOTE:** This measure requires race and ethnicity stratification reporting

## DENOMINATOR:

Identifies the unique count of members, age groups (46-50; 51-75). Note: Because this measure looks back at least 24 months for screening, the eligible population includes those who could have been 50 years of age at the time of screening.

## REQUIRED EXCLUSIONS:

Excludes patients that are 81 years of age and older with frailty, age 66-80 years of age with frailty and advanced illness or is in hospice care or palliative care during the measurement year. Members with a diagnosis of colorectal cancer or a total colectomy procedure done any time prior to or during the measurement year.
