

HEDIS OSW Osteoporosis Screening in Older Women

Measure Description

1033 - HEDIS OSW Osteoporosis Screening in Older Women - The percentage of women currently 66 to 75 years old who received osteoporosis screening. Exclude individuals with evidence of existing osteoporosis treatment, frailty and advanced illness, or who received hospice services or died during the measurement year.

Rate Type – Higher performance is better

Proprietary Status – The source for this measure specification methodology is HEDIS MY2025 Osteoporosis Screening in Older Women (OSW) - Certified, Adjusted HEDIS measure; Unaudited HEDIS rates; NCQA (owner)

Allowable Adjustments (Measure-Specific)

1. Global allowed adjustments (see Allowable Adjustments - Global p. 5 - 6)
2. Age determination dates may be changed. Age range may be changed within the specified age range.
 - a. HEDIS Definition: 66 to 75 years as of December 31st of the measurement year.
 - b. Merative Implementation: Eligible Age is implemented as of MPED (as stated in technical specifications)
3. Continuous Enrollment (CE), Benefits, Anchor Date, Allowable Gap – Continuous enrollment details and benefits can be modified.
 - a. HEDIS Definition: Continuously enrolled during the measurement year and the year prior to the measurement year with no more than one gap in enrollment of up to 45 days during each year of continuous enrollment.
 - b. Merative Implementation: Individuals need to be enrolled during the measurement year with no more than one gap in enrollment of up to 45 days during the measurement year.

Minimum Data Requirements (months) - 24

Measure Details

Continuous Enrollment - Individuals continuously enrolled with medical and pharmacy coverage during the measurement year and the year prior to the measurement year with one 45-day allowable gap in coverage during each year of enrollment. Members must be enrolled on the MPED.
